Fannie Mae Student Loan Cash-Out Refinance

Student Loan Cash-out Refinance

With this update, we are introducing the student loan cash-out refinance feature, a cost-effective alternative to use existing home equity to pay off student loan debt. This feature provides the opportunity for borrowers to payoff one or more student loans through the refinance transaction, potentially reducing their monthly debt payments. The loan-level price adjustment that applies to cash-out refinance transactions will be waived when all requirements have been met.

The student loan cash-out refinance feature contains elements of both a cash-out refinance and a limited cash-out refinance transaction as described in the table below.

Self-Employment

Fannie Mae

SEB Documentation varies

– One or two years, based on DU findings message
– Business returns may be waived if business in existence for 5 years, income stable on personal returns and using only personal funds
– SEB second job with a loss, not required to subtract
– SEB co-borrower loss, not required to subtract
– Ownership < 25% in partnership or S Corp with a loss, not required to subtract
– Self-employment is NOT a risk factor only with two applicants and one is self-employed and the other is NOT

Freddie Mac

SEB Documentation

– Must be self-employed > 5 years to only obtain 1 year personal and business tax return
  • All other cases require 2 years
– SEB income - must review pages 1 and 2 of 1040 and applicable schedules
  • If positive, no further action
  • If a loss, subtract and if qualifies no further action
  • If doesn’t qualify, full personal and business returns required
– Self-employment is a risk factor in all cases when you are using the income or loss to qualify (meaning you were required to mark the SEB box)
Option 2 -- Loan Delivered Prior To Borrower Starting Employment

This option is limited to loans that meet the following criteria:
- purchase transaction,
- principal residence,
- one-unit property,
- the borrower is not employed by a family member or by an interested party to the transaction, and
- the borrower is qualified using only fixed based income.

The lender must obtain and review the borrower's offer or contract for future employment. The employment offer or contract must:
- clearly identify the employer and the borrower, be signed by the employer, and be accepted and signed by the borrower;
- clearly identify the terms of employment, including position, type and rate of pay, and start date, and
- be non-contingent. Note: If conditions of employment exist, the lender must confirm prior to closing that all conditions of employment are satisfied either by verbal verification or written documentation. This confirmation must be noted in the mortgage loan file.

The employment start date as shown on the employment offer or contract must be within 90 days of the note date.

The lender must document, in addition to the amount of reserves required by DU or for the transaction, one of the following:
- Financial reserves sufficient to cover principal, interest, taxes, insurance, and association dues (PITIA) for the subject property for six months, or
- Financial reserves or current income sufficient to cover the monthly liabilities included in the debt-to-income ratio, including the PITIA for the subject property, for the number of months between the note date and the employment start date, plus one. Current income refers to income that is currently being received by the borrower (or co-borrower), may or may not be used for qualifying, and may or may not continue after the borrower starts employment under the offer or contract. Current income may be used in lieu of or in addition to financial reserves. For this purpose, the lender may use the amount of income the borrower is expected to receive between the note date and the employment start date. If the current income is not being used for qualifying purposes, it can be documented by the lender using income documentation, such as a paystub, and no verification of employment is required. For calculation purposes, consider any portion of a month as a full month.
Income Commencing After The Note Date

**Freddie Mac**
- Must start within 60 days (vs Fannie 90 days)
- For Option Two, verifying income and liquid assets to pay expenses until employment starts (no plus one month)
